Administrative Summary
ADMINISTRATIVE SUMMARY

David W. Boilard, Director of the Library
Dawn Durivage, Administrative Assistant

To characterize Fiscal Year 1993 as one of change is to underestimate the enormity of the transformation that took place. The changes which occurred were profound alterations to the way in which the library provides services and performs its operations.

Two primary features distinguish these changes. The first is the major shift in emphasis from a passive posture in public services to an active one in which "customer service" and quality control measures are paramount. This involved changing staff perspective on the different groups who use the library, developing a team spirit, and making a number of organizational and facility modifications.

The second feature is the application of information technologies. Virtually every aspect of library operations has been computerized in some way. This has had the benefit of integrating most of them, and enabling a shift of staff from technical to public services where the demand for service is increasing.

Further, the implementation of OhioLINK, Internet access, and campus electronic mail enables the library to extend its services beyond its physical walls. Patrons can now search the on-line catalog of the Mulford Library, as well as those of numerous other higher education libraries in Ohio, from office or home. Using library computers, they can access Internet to search library catalogs and other databases all over the world. Plans for additional electronic library services are underway by both the Mulford Library and the OhioLINK staffs.

Most importantly, the implementation of these technologies marks for the library the beginning of the change from a physical repository to an electronic information service which will be increasingly independent of physical location.

As significant and as exciting as these changes were, they did not come without hardships. The speed at which OhioLINK was implemented forced some changes to occur faster than desired. Not all staff were pleased with the resulting reporting structure or with the modifications to their job tasks. This necessitated numerous meetings with the staff, both in groups and individually, as well as with Personnel officers, Affirmative Action officers, and officials of the employees Union.

Nevertheless, library services and operations have been permanently altered, and all staff have accepted the changes and are working together as never before, with only minor exceptions.
Nursing and Allied Health

Collection development for the nursing and allied health programs, a priority for the library, was retarded due to the serious cut in the operational budget. Nevertheless, of those books which were acquired the highest proportions were for these programs. Of 313 books acquired, the two largest collecting areas were in nursing (19%) and in the allied health sciences (42%), the latter representing the establishing of core collections in the three program areas. Only one nursing title and no allied health titles were dropped as part of the journal cancellation project. One nursing and four allied health titles were added as new subscriptions.

In April, 1993 the Occupational Therapy program was reviewed for accreditation. The library submitted data regarding its collection and services. The program received full accreditation with no negative comments about the library, a happy counterpoint to the nursing accreditation of 1991, and a confirmation of the library's emphasis on core collection building.

Computerization and OhioLINK

During the year, additional back-up training and assistance for staff in using their new computers was provided by librarian James Garrett of the newly formed Computer Services.

OhioLINK, the on-line library system for Ohio's higher education system, was implemented at MCO with a ribbon cutting by President Richard R. Ruppert on June 29, 93. The local system for the Mulford Library was named OSLER (On-line System for Library and Educational Resources). OhioLINK provides access to the holdings of 7 colleges and universities and to some literature databases. Another 11 institutions and more databases will be added in FY 94/95. Locally, OSLER provides access to the Mulford Library's catalog of over 112,000 book and journal holdings.

Funding support for implementing OhioLINK was provided through the Vice President for Academic Affairs. Special mention must be made of the crucial support provided by Information Services and Facilities Management in wiring and other preparations for this important advance. An accounting of the tremendous effort required to implement OhioLINK can be found in the Computer Services and Technical Services sections.

Plans were developed with Information Systems for jointly offering an information technology training session for faculty/staff in the Fall of 1993, and for sharing database equipment. This presages future synergistic efforts where expertise in different areas and the sharing of common technologies can offer a better service to MCO than either could provide individually. Similar cooperation already exists between the library and the Computer Learning Resource Center.
Staffing

Adequate staffing was crucial to carrying out the plans for implementing computerization and building a foundation for new and improved services. A cadre of experienced librarians was recruited in Spring and Summer 1992 to effect this. The first of these included a Coordinator of Reference Services and a Computer Services Librarian. By August, recruiting for the professional staff was completed with the Assistant Director of Public Services (Ms. Margaret Moutesous). She began working with the Circulation, Interlibrary Services and Reference units. A comprehensive report on the impressive changes she accomplished is contained in the Public Services section.

During the year, the staff was restructured for better efficiency and improved customer service. Primarily, the shift was from technical services, where computerization relieved the need for existing staff levels, to public services where demand was increasing.

Specifically, James Damas’s reportability was changed to Circulation and Barbara Huntley assumed some of his technical services tasks. Alexandra Kuby, a librarian, moved from Interlibrary Services (ILS) to Reference where she was needed more. David Remaklus moved from Technical Services - Serials to the newly created position of Supervisor of ILS. Anne Bushel, in turn, moved from Acquisitions to take Mr. Remaklus’ job. Finally, Acquisitions was moved under Technical Services.

Also, students were hired to perform some of the more menial though still important library jobs, such as helping to shelve books and journals, assisting in shifting the journal collection and other similar tasks. They provided the library some staffing flexibility at a low cost.

Two new positions have been approved for FY 94: a reference librarian to handle the workload increase from OhioLINK, and a circulation supervisor to relieve the Assistant Director of Public Services to work on other service areas, such as user education.

Reclassification of most of the classified staff, a long process, is expected to be completed in early FY 94. Funding for this has been tentatively approved. Also, a promotion has been requested for Marlene Porter from Coordinator of Reference to Head of Reference & Research Services to manage the growing staff. During the year, two library staff members retired and one resigned to pursue other opportunities.

Anticipated needs for FY 95 include the eighth librarian, one classified and one student assistant FTE. Talks are underway for integrating the Computer Learning Resource Center with the Library, but anticipated staffing needs for this are unknown.

Special thanks is extended to the Office of Affirmative Action and to the Office of Personnel for their assistance in working with staff as library changes occurred.
The Budget: Journal Cancellations

The unusually high 17% inflation rate for journal subscriptions coupled with a 15% decrease in funding necessitated journal cancellations for 1993. A total of 414 journals were cancelled, dropping the cost for subscriptions from $454,381 to $426,252. To avoid additional cancellations, book purchases were slashed from $48,000 to $20,000 and journal binding was seriously retarded. A list of journal cancellations is included on p. 46 of the Technical Services section.

The Library Advisory Committee was instrumental in reviewing and fine tuning criteria for the journal cancellations. Funds from the library’s newly formed fee-for-service revenue (cost recovery) account were used to supplement the book budget.

Extra, non-budgeted costs are expected for the library in FY 94 due to (1) the interlibrary loaning of articles from journals which were cancelled; (2) copyright royalties for articles which exceed the copyright guidelines -- a policy which was inconsistently applied in the past. However, the inflation rate for journals should be under 11% if the U.S. dollar remains stable. A drop of another one-half percent will cover much of the interlibrary loan deficit.

Other

On June 29, 1993 the library provided its facilities for, and assisted in, the MCO staff farewell reception for President Ruppert.

Work has begun on the OhioLINK regional storage facility for Bowling Green State, the University of Toledo and MCO. It will be located in Perrysburg and should be completed in late FY 94 or early 95.

The addition of Dawn Durivage, B.B.A., as Administrative Assistant will enable the library to manage its accounts on a local computer for better control.

Victoria Leslie, Dana Ridge, Bernard Smothers, Laurie Stanton, Donna Tinsley, Chris Wesner.

STAFF CHANGES

Anne Bushel's title changed from Acquisitions Assistant to Serials Control Assistant effective March 10, 1993.

Stephen G. Cook changed from a part-time to a full-time Circulation Assistant on June 1, 1993, filling vacant position upon James Damas' resignation.
James Damas resigned from his position of Technical Processing Assistant on March 31, 1993.

D. Joan Derrick retired as Administrative Assistant effective February 27, 1993.

Dawn F. Durivage was hired as the new Administrative Assistant effective June 7, 1993.

Chrindye Finley changed from a Student Assistant to a Library Assistant (.50 F.T.E.) on February 15, 1993.

Alexandra Kuby moved from Interlibrary Loan Services to Reference Librarian effective March 10, 1993.

P. Scott Mange was hired as a permanent position of Circulation Assistant on June 1, 1993.

Margaret Moutseous was hired as the new Assistant Director of Public Services effective August 15, 1992.

David Remaklus moved from Serials Control Assistant to Supervisor of Interlibrary Services effective March 10, 1993.

Sarah Salley's position as Special Projects Assistant was abolished on March 31, 1993 (supported by Dean's Office funds).

Anne Trinchero resigned her position of Library Assistant (.50 F.T.E.) as of December 31, 1992.

Public Services

- Public Services Summary
- Circulation
- Interlibrary Services
- Reference
PUBLIC SERVICES

Margaret L. Moutseous, Assistant Director of Public Services

Public Services was activated in August 1992. The Assistant Director of Public Services' job is to coordinate the services and operations of all the units which deal with the "public," or library users, and to bring them to state-of-the-art efficiency and effectiveness. The units under Public Services are Circulation, Interlibrary Services and Reference Services. Included in these are access to, and management of, library facilities, such as collection stacks, the photocopy area and seminar rooms.

There were many changes for Public Services units in fiscal year 1992/1993: new procedures, new staff and restructuring of certain departments. New procedures were established in the Circulation, Reference Services, and Interlibrary Services departments. Restructuring occurred in these departments as well. New staff members were added to the Circulation Department.

A major organizational restructuring of the library benefited Public Services by augmenting its staff size and realigning its configuration for greater effectiveness. Interlibrary Loans was renamed to the Interlibrary Services Department (ILS) to better reflect its role. Alexandra Kuby left her position as supervisor in ILS to join the Reference Services Department. David Remaklus left Technical Services to become the supervisor in ILS. Anne Bushel took on the task of serials check-in and binding. James Damas' reportability had been changed to Public Services, and after he resigned his full position was moved to Circulation.

Steve Cook moved from part time night Circulation to fill this full time daytime slot. A great deal of coordination between departments and guidance from the Personnel Department occurred in these changes. Scott Mange moved from student helper to part time Circulation nights. Students were hired to take over most of the shelving and article photocopying, releasing regular staff for their primary duties.

Interlibrary Services:

Mrs. Kuby had spent eight years directing the ILS department prior to her move to Reference Services. During that time she made major contributions in organizing the department. Mrs. Fabian and Mrs. Champion are key workers in the department.

Mr. Remaklus has also made major contributions in the ILS Department, by questioning all procedures, searching for better solutions in organizing the department, and then implementing those solutions in a timely manner. New ways of keeping statistics were implemented because of OhioLINK interlibrary loan changes. Discussions occurred in April 1993, and new methods of record keeping were in place.
by June 1993. Another policy change occurred in July 1993 to ensure copyright compliance. This included monitoring the number of interlibrary loans requested by MCO personnel and keeping track of copyright usage.

Mr. Remaklus also took over the task of hiring and supervising the student workers. Prior to accepting this position in ILS, Mr. Remaklus was instrumental along with Jim Damas in shifting all of the pre-1970 journal collection to the sixth floor of the library. Both Mr. Remaklus and Mr. Damas disposed of outdated materials in an effort to utilize space more effectively.

_Circulation:_

The Circulation Department worked hard during the year to change from a manual system to an automated one. A great deal of work was essential to accomplish this goal. Many changes were necessary not only in how procedures were done, but in physically changing the location of equipment and moving the Reserve Collection from one location to another.

Every member of the Circulation team made major contributions in the task of bringing up the OhioLINK circulation module: Carrie Bowman, Steve Cook, Jim Damas, Chrindye Finley, Mary Houston, Scott Mange, and Rose Tammarine. Special thanks also go to Anne Bushel and Elizabeth Fabian for learning the circulation system and for graciously filling in when there were staffing problems. Additional contributions were made by: Marlene Porter, Jim Garrett, Alexandra Kuby and John Lucas.

Another notable change was the use of student assistants. Student workers contributed to the library by shelving books/journals for Circulation, which in turn helped Interlibrary Services retrieve them efficiently. They also worked for Interlibrary Services in photocopying articles for faculty and for interlibrary loans.

The Assistant Director of Public Services established a recruiting process with the MCO financial aid/work study program to hire student assistants, hence reducing the financial burden on the library budget. A work study student is paid on a ratio of 70% work study funds to 30% departmental funds. Our first two work study students were Scott Mange and David Blank. Both worked on shifting journals.

A group of four other students were interviewed, trained and replaced on three separate occasions: November 1992, December 1993, and May 1993. The second group worked as a team and made major contributions to the library. These included keeping up with shelving, working in the ILS department, and bar coding the monograph collection. They were willing to do any assignment. The last group was hired with the goal of keeping them for at least two years, thereby reducing the amount of paperwork and training involved in this process.
Reference Services:

With Mrs. Kuby's addition to the RS Department, scheduling problems were reduced and the ability to meet the growing demands of providing on-line services was established. Marlene Porter has made major contributions to the department by planning, organizing and moving the reference collection, scheduling the Reference Desk, being the primary searcher for the Library, working on special projects like editing the OSLER screens, designing Public Services handouts, Patron Registration Forms, and the Reserve Collection request form. Without her contributions, the RS Department would not be the dynamic and vibrant department that it has become today.

RS-Education and Outreach Services:

In the Fall of 1992, the Library worked closely with the faculty to schedule many library tours. Margaret Moutseous addressed the junior nursing class about library resources, taught one class about on-line searching skills along with individual/group break out sessions that lasted forty-five minutes to a graduate nursing class. Mr. Boilard and Ms. Moutseous taught bibliographic instruction to a Physical Therapy class. Once again individual/group break out sessions were also available for the students. Over six follow-up sessions happened from this one class.

Break out sessions which included individualized or group instruction of how to use CD Plus was a most successful feature during the academic year. A couple of medical residents also requested sessions. Phrases used by students after completing the session included "wishing they had this information in their first year" or "how useful it was when taking Dr. Mutgi's rotation." One resident later returned and stated that this "forty-five minute session saved her four hours worth of work."

An introductory OhioLINK session was held for deans and computer savvy MCO faculty members in the winter. Additional sessions were made available for the MCO community throughout the year.

Ms. Moutseous has also worked closely with Rosalind Peters, the nursing representative from the Library Committee, to ensure that nursing needs were being addressed by Library Administration. Mrs. Peters brought with her eight objectives and during this past year six of the objectives were met.

Mr. Boilard and Ms. Moutseous also participated in the accreditation process in the Occupational Therapy program. Both attended a mock interview review board planned by the OT students and later answered questions in the official review process. The Library was not mentioned as a deficiency in the accreditation process. Bibliographic Instruction and participation in the curriculum remain a goal to achieve in the years ahead. A short term goal for next year is to expand the number of courses offered by the RS Department.
Facilities Management and Administration:

During this past the following improvements were accomplished:

In September the photocopy machines were re-located to the fifth floor to maximize usage (electrical wiring needed to be added along with shelving units).

From October to December, the Library management team developed a plan for adding wiring and network connections to the fourth, fifth and sixth floors for the OhioLINK project. The initial work was scheduled for winter break, however, due to a delay in state funding it was not possible to get the work done at that time. Wiring and network connections were installed in February. The On-line Resources Room was painted, shelving units were removed and carpeting fixed.

Additional shelving units were added to the Reserve room in September, along with additional shelving units to the sixth floor. Changes were also made in the ILS office to expand office space available for staff members and new equipment. Cupboards were removed creating over 36 inches of additional space. Office furniture was also moved.

Additional lighting was added in early 1993 to the fifth floor to create better lighting for the students to study. The roof was also fixed this year and moneys were made available to fix the skylight. The library was also selected as a test site for new lighting on the fourth floor. A request has been made to install this lighting permanently.

Throughout the year Facilities Maintenance did a wonderful job in working with the Library staff to solve problems. Randy Foore, Rodger Kokensparger, and Ed Dohse were outstanding in working with Margaret Moutseous to solve problems. They proposed good ideas and completed jobs in a timely and effective way.

Information Systems also made major contributions in the process of bringing up OSLER/OhioLINK and must be recognized for their fast response and flexibility in the face of many deadlines and obstacles. In particular, Paul Scheuer and his staff, Ted Ronau and others too numerous to mention, were instrumental.

Ms. Moutseous held regular staff meeting with the ILS and Circulation departments and met with the Coordinator of Reference Services during the year. Two sessions were offered to the staff in October and November to discuss the changes in the library. Additional sessions on customer services were scheduled and everyone in the Public Services Department attended. Brenda Hoot, Director of Affirmative Action Training, was the trainer for all sessions. Ms. Moutseous and Ms. Hoot have developed a short range plan for offering additional training sessions that meet the needs of the library staff. Supplemental training opportunities were created by sending individuals off campus to workshops in Toledo or Columbus.
CIRCULATION

Mary Houston, Circulation Assistant,
Rosemary Tammarine, Circulation Night Supervisor
Carrie Bowman, Circulation Assistant
Stephen Cook, Circulation Assistant
Chrindye Finley, Circulation Assistant
Scott Mange, Circulation Assistant

Staffing:

Staff turnover in the Circulation Department that occurred this year include the following: Ms. Anne Trincher, a part-time Circulation staff member, accepted a position in the CLRC in the fall of 1992. She was replaced with Miss Chrindye Finley, formerly a library student worker. Miss Finley’s part-time student position was then filled by another student worker. In early spring, Mr. Damas, whose reportability had been changed from Technical to Public Services, resigned his position as a full-time Circulation staff member, and Mr. Steve Cook, a part-time Circulation staff member, accepted a full-time position. Mr. Cook’s part-time position was then filled by Mr. Scott Mange, formerly a student worker.

Student workers were recruited to help with circulation activities such as shelving and shifting the collection. They made a major contribution. Although recruiting and training cost considerable time due to turnover, it gave Circulation (and ILS) additional staff at lower dollar cost, and permitted greater scheduling flexibility.

Automation:

The Circulation Department spent considerable time working on implementing the circulation module of the OhioLINK system and OSLER, the Mulford Library’s local on-line catalog.

This first step involved working with the Computer Services Librarian, Jim Garrett, to establish the profiling backbone for the automated circulation system. Again there was some resistance and some reluctance to attend meetings from the Circulation staff. However, by the end of 1992 all computer profiling work was accomplished. A week long training seminar was scheduled for the Circulation staff and Circulation relief workers in December. This was a highly successful training session and established a sense that “we could do this” among library staff members.

From January to March of 1993, the Circulation Department along with Mr. Garrett worked hard to register users, learn the system and practice checking items out and in. Mr. Garrett was the “guiding light” by which the Circulation staff worked to bring up
the system. Without Jim’s quiet yet complete assistance, this project would have taken much longer to accomplish.

On June 29, President Richard R. Ruppert activated OhioLINK and OSLER in a ribbon cutting ceremony as part of his retirement reception. Full access to the system via computers and terminals on the 4th and 5th floor public areas is planned for August 26, 1993.

Reserve Collection:

In early September the Reserve Collection was moved from Room 407 to Room 408. This was done for two reasons, to reduce the number of books lost and to create a computer room for OSLER. This first change was met with much resistance from the Circulation staff since the closed stack environment created more work for them. The reprint collection was also moved at this time. Prior to this move, this collection was staffed with the concept of self serve and many items were either lost or misplaced. With the new location closer to the Circulation Desk, it became much easier to monitor usage.

Goals:

Goals for next year include adding a Circulation Supervisor to ensure quality service at the Circulation Desk, developing new automated procedures for processing the Reserve Collection, and creating adequate shelf space for 5 years growth for the journal collection.

INTERLIBRARY SERVICES

David Remaklus, Supervisor, Interlibrary Services
Susan Champion, Fax Operator/Billing Assistant
Elizabeth Fabian, Interlibrary Loan Assistant

Workload

Interlibrary services procedures have been basically the same as in the past, although the new year promises to bring many new advances. In the fiscal year 1992-93, ILS's total workload decreased by 8.09%, which includes in-house photocopy services as well as interlibrary loans. Interlibrary loans dropped a mere .85%, while photocopies fell 32.64%. It appears that staff and faculty are concluding that it is more cost-effective to make their own photocopies. The .85% drop in total interlibrary activity is partly due to a drop of 7.62% in loaning and a rise of 7.19% in borrowing. This is the result of the major cut in journal subscriptions in 1993. Fax services have remained constant with only slight changes.

Concerns

The two major concerns for FY 94 are the changes in workload as a result of OhioLINK, and the Ariel electronic document delivery system.

Although OhioLINK offers many benefits to both staff and patrons, it will also bring an increased workload to ILS. OhioLINK has many small hospital libraries as members which will be of little value as a resource for MCO. We can expect them to generate many requests and in turn supply us with very little.

Ariel is a method of sending documents free of telecommunication costs over the Internet. This should allow fast and free service for our patrons. Our concern is this: currently we photocopy documents at night, using the help of hired students, and mail them out the following morning. Heavy use of Ariel may require additional staff in order to scan the materials into the computer during the day.

Copyright:

Compliance with the copyright laws is a major concern for ILS. Arrangements will be made in FY 94 with organizations which will include royalty fees for copying articles which have exceeded the CONTU guidelines of 5-6 copies per year from any one journal title. The estimated cost is $2,000, based on last year's activity. But this does not consider the expected interlibrary loan increase due to the loss of the 414 titles which were cancelled in FY 93.
Journal loan requests which exceed the copyright guidelines for the current and previous four years are reviewed regularly. The statistics, among other criteria, are used to help determine which journal titles should be added to the collection. The journals which were added in 1993 are included in the Technical Services section of this annual report. Journals which will be added for 1994 have not yet been determined.

Billing

The 92-93 fiscal year has shown a dramatic reduction in billable services. As a result of decreased photocopying and the new policy of no longer charging for literature searches for faculty and staff, we have seen a 63.23% drop in internal billing. This, coupled with a decrease of 11.87% in external billing, has resulted in revenues dropping 27.94%. In the Fall of 1992, Ms. Champion put billing onto the latest version of Peachtree for more power and better record keeping.

Staff Changes

In June 1993, Mrs. Alexandra Kuby, a librarian, was appointed to the Reference staff full time. Mr. David Remaklus was appointed to the newly created classified position of Supervisor, Interlibrary Services.

Student staffers who worked for Interlibrary Services during the year were: Bernard Smothers, Jennifer Matheson, Victoria Leslie, and Dana Walter.

REFERENCE SERVICES

Marlene Porter, Coordinator of Reference Services
Alexandra Kuby, Reference Librarian

This was a busy year for Reference Services. Reference staff meetings were a weekly occurrence at which the Coordinator of Reference Services took minutes and distributed them to all library staff. In June 1993, the minutes distribution included the Computer Learning Resource Center staff. This has become a good vehicle for informing staff of policies and procedures for the library.

Staffing

In June, Alexandra Kuby joined as a full-time reference librarian under the supervision of the Coordinator of Reference Services. The addition of this position has established credibility of the Department as well as increased staffing in an area sorely needing it. All other librarians participate in providing reference service with the exception of the Director.

Reference Desk

The Reference Desk moved twice this year. At the beginning of August 1992, it moved from the fifth floor to the fourth floor next to the Reference stacks for more rapid access to those resources and to literature indexes among other reasons. The second move occurred in mid-March 1993 to a more visible location. It is now located near the Circulation Desk and in front of the On-line Resources room. When the move took place, a personal computer was installed, so that the librarians could access OhioLINK, our on-line catalog and other necessary computer programs.

Files with important or relevant information were established by the Coordinator of Reference Services. These files became a good source for people who staffed the Desk. Also established was a Reference Desk e-mail account. It became activated at the end of September 1992. We anticipate opening reference services via E-mail during the next fiscal year.

Staffing at the Desk has been steady for the year with the addition of more librarians. The normal hours became 9:00 a.m. to 5:00 p.m. Monday through Friday. The shifts are 9:00 a.m. to 12:00 noon (3 hours), 12:00 noon to 2:30 p.m. (2.5 hours) and 2:30 p.m. to 5:00 p.m. (2.5 hours). During the summer, the morning shift became an "on-call" shift. This was done to allow librarians time to work on projects.

A standardized method of statistics keeping was introduced which will serve for better analysis on a monthly and annual basis.
Reference Collection

In preparation of the Library's on-line system, barcoding of the Reference Collection occurred. It was a slow process which included weeding and decision making on how many years to keep serially published items. Many old and out of scope materials were removed from the collection, making the collection easier to use. Barcoding of the collection should be completed by September 1993.

The index collection was reviewed and recommendations were made concerning withdrawals, cancellations and shifting items to the sixth floor. Numerous indexes were withdrawn due to years covered and duplication by another sources owned by the Library. Indexes canceled, due to budget cuts and constraints, were: Science Citation Index, the Dissertation Abstracts indexes, the Cambridge Scientific Abstracts indexes and Current Contents: Physical, Chemical and Earth Sciences. On-line access to these indexes was one of the major considerations before cancellation.

Shifting of the literature index collection began in March 1993. The Library now has a complete run of Index Medicus (IM), including all of its previous titles. Some of the volumes were brought down from the sixth floor. The current year plus five previous years of IM are on index tables and the rest of the index is on the upright index stacks. Chemical Abstracts (CA) was weeded and shifted as well. Future shifting and reorganizing of the index collection will occur during the next fiscal year.

On-line Searching

A new fiscal policy for on-line searching was established in September 1992. Medline searches became free for MCO faculty, staff and students thanks to Medline access via the Institutions subscription to CD-Plus. This caused a dramatic drop in searching financial income. For databases which are accessed via newly established BRS and Dialog accounts with Ohionet, a $10.00 charge plus the cost of the search was instituted. For non-MCO patrons, searches continued at $25.00, but now include any additional database charges the Library might incur.

Access to CD-Plus Medline was made available via a floppy boot disk used in certain Library networked personal computers. Regular network access of Medline was not available all year, however, numerous people were working to make it possible.

Miscellaneous

Current library related journals and newsletters became housed in the Reference Office. Bound issues of the journals continued to remain in the journal stacks. Ms. Kuby set up an area for this material. Next fiscal year a more permanent reading area for the material will be established in the Reference Office.

August 1993
Technical Services

Cataloging, Acquisitions, Serials Control
and Collection Profile
From August to October, the library went through a journal cancellation process. All titles were reviewed and approved for cancellation by the Library Advisory Committee. Each title had at least one broad subject designation, if the title is held locally (by the University of Toledo or Bowling Green State University), the current cost, and the number of regional medical libraries currently subscribing to the journal title. The faculty responded with comments for any journal title they wanted the Library to retain. In addition, the Chairman of each department received a list of the library’s entire current journal subscriptions broken down by the same broad subjects. By the end of October, the final list of titles to be canceled in 1993 was determined. There were 414 titles canceled with a saving of approximately $124,861.13. There were 36 new titles added to the collection for 1993. Their cost in November 1992 came to $8,590.40. The lists of canceled and new titles are included.

In April, a new Union list of serials for 1993 was produced through OCLC. The changes in the status of the canceled titles were made prior to the production of the Union list. For each new title added for 1993, the estimated starting volume was also included. Further, a number of titles having very scattered volume holdings, were identified. Factors such as ownership of succeeding titles, completeness of those holdings, appropriateness to the collection and others determined their continued inclusion into the collection. A list of those titles to be withdrawn was given to David Remaklus, who weeded them as the journal shifting continued.

With the move of Technical Services to the third floor, the area was rewired for the dedicated phone line to connect the dedicated OCLC terminals. One is used for union list maintenance, serials and acquisitions. The second is used for cataloging and assisting in projects.

During the last half of 1992, Mrs. Sarah Salley completed the inventory of the monograph collection. Mr. Salley then reviewed those titles, and where she could find neither the item or any record of it being checked out, the item was considered missing. Mrs. Salley then began removing card sets from the card catalog and our symbol from the OCLC database.

In March 1993, James Damas resigned. He had been working one-half time for Technical Services. Shortly thereafter, David Remaklus left for Interlibrary Services. Anne Bushel took his place. At the same time, Acquisitions was moved under

Computer Services
COMPUTER SERVICES

James F. Garrett, Computer Services Librarian

Fiscal year 1992/93 continued the process of building and strengthening the computing resources of the Library. OhioLINK was by far the strongest influence, but significant advances were also seen in staff development and more efficient use of microcomputers.

OhioLINK

Participation in the statewide OhioLINK project has allowed Mulford Library to begin automating many of its procedures. Because this was the Library's initial foray into automation, it was necessary to purchase a wide assortment of equipment. This involved extensive research into various product alternatives, with consultation with Information Systems and Materials Management where appropriate. Equipment under consideration included microcomputers, "dumb" terminals, printers, barcode scanners, and all of the supporting hardware, such as printer-switching devices and security cables.

Once acquired, each piece of equipment needed to be installed, configured and tested. In some cases, it was necessary to work closely with Information Systems to ensure proper integration into the MCO network. Of particular concern were the terminals and microcomputers, which required extensive rewiring of the fourth and fifth floors. Once connected, each microcomputer had to be made "network aware," a process that takes as much as two hours per machine.

New furniture was needed to accommodate the influx of equipment and allow efficient use by library patrons. After reviewing several standard catalogs, the decision was made to use the services of an outside firm in the selection of appropriate furniture. The Library chose Library Design Associates, based in Columbus, as its consultant. Tables were purchased to handle standing and sitting patrons, chairs were added where appropriate, and furniture to adhere to the American Disabilities Act was included.

Throughout the year, the Library worked closely with OhioLINK staff and Innovative Interfaces, Inc., the automation vendor. Library personnel from all departments assisted in the complex process of translating established workflow into automated procedures. To ease the transition, Innovative Interfaces provided several weeks of in-depth training on the use of the new system, with an emphasis on technical services and circulation. A final training module, which will deal with acquisitions procedures, will take place early in fiscal year 1993/94.
Perhaps the most critical component in automating the Library was the preparation of our OCLC tapes for inclusion into the electronic catalog. Staff from various departments spent several months developing a detailed data profile to ensure the proper transfer into the OhioLINK system. Once the data had been moved into the MCO system, another review process was needed to verify that the transfer was successful. This OCLC data, which totals more than 40,000 bibliographic records, forms the core of our online catalog.

With the inclusion of our OCLC records, it was possible to begin incorporating the automated system into everyday library tasks. Circulation was the first department to migrate to the electronic system. Circulation personnel undertook the complex and labor-intensive job of registering each library patron and then moving the manual circulation files into the automated environment. The transition went smoothly and all circulation transactions are now conducted electronically.

Cataloging also began to use the system quite early. At first, much of the time logged on the system was spent correcting problems that are inevitably discovered after a database is first loaded. With the addition of the OCLC export module, which is expected to be activated in August of 1993, cataloging will be able to perform much of its daily work on the Library system.

By the end of fiscal year 1992/93, work had also begun on the public portion of the catalog. Decisions are being made on screen displays, menu designs, dialup access, online help and user education. The system was officially activated on June 29, 1993. But going "live" with the online catalog in all its capabilities is slated for the end of August 1993.

Other Projects

Because the staff was becoming increasingly dependent on computers to perform their assigned duties, additional in-house instruction was given on key applications. Every staff member attended a two-hour refresher on Microsoft Windows 3.0. In addition, shorter classes on PC Mail and OnTime for Windows were offered.

Additional microcomputer software was purchased to enhance existing MCONet applications. Microsoft Publisher and Visio were acquired to address straightforward graphics projects. QuickBooks has been added as a simple means to track library expenses. A copy of Procomm Plus for Windows was bought for accessing remote databases. And an upgrade for PeachTree was purchased for billing purposes.

Other useful software came "bundled" with the purchase of microcomputers, including Microsoft Visual Basic, a programming language, and Borland's Paradox, a database management system. Several small utilities have already been written or planned with Visual Basic, and the Circulation Department is using Paradox to help track computer-generated fine notices.
Some computer equipment has been purchased for educational purposes. A laptop computer, LCD projection panel and portable overhead projector were bought for instruction in the field. This equipment will allow any staff member to connect to Library resources from any site that has an existing telephone jack. The projector and panel give the capability of working with small groups in a classroom setting.

Preliminary work has been done on the purchase of a CD-ROM tower to run commercial databases over the network. The selected tower would allow up to 50 concurrent users to access as many as seven CD-ROM products. As necessary, additional towers of seven drives each can be "daisy chained" to the existing tower, ensuring that the system can grow as the Library expands its services.

APPENDIX B

GLIDDEN L. BROOKS AWARD

The Glidden L. Brooks Award is presented annually to the student who is distinguished by superiority in all phases of the curriculum as selected by the Promotions Committee.

The medal is named in honor of the first president of the Medical College of Ohio. Each one is constructed of gold and numbered. The medal was designed by Alan Melis of the Toledo Museum of Art.
