Library Assessment Committee
February 2, 2010
9am-10am

</div>

Committee Members Present:

Marlene Porter, Sheryl Stevens, Misa Mi, Mark Horan, Daniel E. Feinberg

I.   Minutes from the 1-19-10 approved
II. Survey questions regarding the survey handout:

   A.   Compartmentalization of the issues regarding the library can cause problems. Students might not answer all of the questions due to lack of effort; and this could lead to skewed results.
   B.   Evenly distributed questions from different categories could prevent skewing
   C.   Grouping can happen either way.
      •   If there is a pattern, then it can be figured out.
      •   Checking all the same of the responses or not completing it at all
      •   Random organizations can avoid pattern breaking.
      •   Random organization might cause people to answer more truthfully.
      •   However it was pointed out that having a grouped format does cause users to think of the concepts logically/in a similar mindset.

III. Should we include all libraries?
      •   Carlson
      •   Mulford
      •   Engineering

      •   Scott Park
      •   Online
      •   LaValley

IV. For a copy of the survey thus far, see the L:// drive.
